Exp.no:13 Implement your own Ping Program

13.10.26

Aim:

To Implement a ping program.

Code:

```
import os
import platform
import subprocess
def ping(host="google.com", count=4):
    param = "-n " if platform.system().
        lower() == "windows".
    else "-c" command = ["ping",
    param, str(count), host]
try:
    output = subprocess.check_outp
    (command, universal_newlines
        = True)
    print(output)
except Exception as e:
    print(f"Ping failed: {e}")
if name_ == "_main_":
    ping("8.8.8.8")
```

Output:

Pinging 8.8.8.8 with 32 bytes of data:

Reply from 8.8.8.8 : bytes = 32 times = 6ms
TTL=119

Reply from 8.8.8.8 : bytes = 32 time = 9 ms TTL=119

Reply from 8.8.8.8 : bytes = 32 time = 5ms TTL=119

Rely from 8.8.8.8 : bytes = 32 times = 9ms TTL=11

Ping stastistics for 8.8.8.8 :

Packets: Sent = 4, Received = 4, Lost = 0(0%.lo

Approximate round trip times in milli seconds :

Minimum = 5ms, Maximum = 9ms,

Average = 7ms.

Result: 6

Thus, Implementation of Ping Program is done succesfully.
